

## LIFITEX PRO 165

FIBREGLASS MESH FOR INSULATION SYSTEMS – ETICS  
Certified according to European Technical Approval (ETAG 004)

### Product description

Reinforcing fibreglass mesh fabric with alkali resistant coating, fibreglass fabric made of E-glass with special equipment for high tear and tensile strength and alkali resistance.

### Technical properties

Fabric type: fabric in leno weave  
Weight (raw, untreated): 130 g/m<sup>2</sup> (±7%)  
Weight (coated, treated): 165 g/m<sup>2</sup> (±7%)  
Threads per dm warp direction: 2x24 (±2x1)  
Threads per dm weft direction: 20 (±1)  
LOI: 20% (±6%)  
Mesh size: approx. 4x4 mm  
Roll width: 1m (±0.01m)  
Roll length: 50m (±0.2m)

Store in a dry place, do not expose to direct sunlight.  
Made in European Union.
